

E-TUK LIMO GT

Tuk Tuk Factory proudly presents the e-Tuk Limo GT. As market leader in the marvellous field of electric Tuk Tuks, we learned a lot about your needs and wishes. So we've improved our fastest rising star, the e-Tuk Limo. The GT stands for Grand Tourism, by the way.

FUN, IMPROVED

IMPROVEMENTS!

E-TUK LIMO GT

A
Higher roof means
better vision

B
Reversable seats

C
Lower entry: crawl
right in and out!

D
Better suspension
means a smoother
ride

FUN, FRIENDLY AND CLEAN

E-TUK LIMO GT

We don't believe in gasoline. It's the past. That's why our e-Tuks are 100% electric. It has so many benefits we could write a book about it. But first we want to see our family grow and prosper. Just like your business. So here's the summary:

Freedom

With an e-Tuk, you're 100% autonomous. It's agile, easy to drive and easy to park.

Scale

Start with a big bang, or build your empire one e-Tuk at a time. It's up to you!

Range

Our humongous battery gets you further than the competition. Literally.

Low maintenance

The engine has less moving parts. Is it that simple? Yes, it is.

Low operational costs

Gasoline is expensive and dirty. Electricity is cheap and clean.

High turnover

You can handle up to six passengers per ride. All day, and all of the night. 4 passengers in EU, face forward.

Type approved in most countries

You can immediately drive your e-Tuk in almost every country in the world.

Riding in an e-Tuk is a truly unique experience. Your passengers instantly connect to their surroundings. They've got a 360 view. They absorb the vibe and the sound of the streets (not of the engine, it's completely silent).

TUK!
